1980 Census Profiles of Idaho Cities

Computer-readable data from the 1980 Census known as Summary Tape Files provides a vast amount of information about Idaho and its geographic subdivisions. The file is called summary because the data is aggregated and no characteristics about a single individual, household or housing unit are contained in the file in order to provide for confidentiality.

The following profile contains selected complete-count data of all persons and households in Idaho from Summary Tape File 1. Population items tabulated include age, race, sex, marital status, Spanish origin, household type, household relationship, and families. Housing items tabulated include occupancy/vacancy status, tenure (owner/renter), contract rent, value, condominium value, persons per unit and room, plumbing facilities, mobile homes and units at address.

Data from Summary Tape File 1 is presented in 59 tables. The purpose of this profile is to provide 25 of the most requested and most useful tables to users of census data. Technical assistance, additional data and more detailed geographic coverage, if needed, can be provided by the Division's State Census Data Center program. Tape processing is provided by the University Research Center at Boise State University on a cost reimbursable basis. Sample data items such as income, poverty, education, occupation and energy should be available by early summer 1982.

Most of the census terminology is self-explanatory, however, a brief review is useful to better understand the data.

HOUSEHOLD - the person or persons occupying a housing unit.

FAMILY - two or more persons who are related by birth, marriage, or adoption and who live together. A person maintaining a household alone or with unrelated persons only, is regarded as a household but not a family.

URBAN and RURAL - those incorporated places* with a population of 2,500 or more inhabitants or an urbanized area are considered urban. Rural population consists of all other population areas. Urbanized area is a population concentration of at least 50,000 inhabitants generally consisting of a central city and its contiguous suburbs. Boise/Garden City and suburbs, and Pocatello/Chubbuck are Idaho's only urbanized areas. *also includes Mt. Home Air Force Base.

GROUP QUARTERS - living arrangements such as nursing homes, correctional schools, specialized hospitals, correctional institutions, fraternity and sorority houses, college dormitories, convents, military barracks and rooming houses. The first four arrangements are considered institutional. The final five examples are listed as "other".

HOUSEHOLD RELATIONSHIP - because of changes in American society since 1970, the concept of household "head" has been replaced with that of a reference person in whose name the dwelling unit is owned or rented. This person, the householder, is identified in column one of the Census questionaire. The respondent to the questionaire simply chooses which adult belongs in column one. The husband in a married-couple type family is no longer automatically the householder.

RACE and SPANISH ORIGIN - all persons were asked to identify themselves according to one of 15 race categories. Spanish origin was a separate question and relates to ethnic status rather than race. Most Idahoans of Spanish origin identified their racial category as either white or other. The race and Spanish origin data is provisional.

CONDOMINIUM HOUSING UNITS - data items listed under tab 29 and 40 are only for owner-occupied and vacant-for-sale units. In many counties and cities such a condition did not exist. Total units are listed under tab 29a. Cities with condominium units will have tab 29a listed.
